### **DETAILED ACTION**

1. Claims 1-13 are pending in the application.
2. Applicants' election with traverse of Group I (claims 1 and 2) in Paper No. 15 is acknowledged. The traversal is on the ground(s) that the azeotropic composition, which is claimed as a product in the claims of Group I and which is produced and further purified in the claims of Group II is the special technical feature, which unites the invention of Group I with Group II. This is not found persuasive because prior art anticipating or rendering obvious the invention of Group I (product) would not necessary anticipate or render obvious the invention of Group II (process). Thus, an undue burden of search would be required to prosecute the two distinct inventions.

The requirement is still deemed proper and is therefore made FINAL.

3. Claims 3-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 15.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 11/13/1998. It is noted, however, that applicant has not filed a certified copy of the JP 323496 application as required by 35 U.S.C. 119(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 and 2 are rejected under 35 U.S.C. 102(a) as being anticipated by Hibino et al. {EP 0864551 A1}.

Hibino et al. disclose the presently claimed composition consisting of 1,1,1,3,3-pentafluoropropane and 1,1,1-trifluoro-3-chloro-2-propene (1-chloro-3,3,3-trifluoropropene or HCFC-1233zd) (see Examples 1-10 and Tables 1-11).
